

NMLS Enhancement: Single Login to Access All NMLS Accounts

Jul 23

CSBS has enhanced NMLS to provide industry users with a simplified account setup and management process. The new streamlined and secure process allows NMLS industry users to create one username and password to access NMLS. This enhancement improves the account management process for more than 50,000 NMLS users who have more than one account.

How it works

The username for the first account an NMLS industry user chooses to update will become their login. They will then follow a guided process to add all their accounts to this login. This step must be completed only once.

Once users consolidate their accounts, they only need to remember their primary login. This will enable them to easily switch between accounts without having to log out of one account and into another.

NMLS login has a new look!

We've updated the login to NMLS and you need to provide an email address that can be used for both login and recovery of forgotten login credentials. Personal email address is highly recommended.

Your NMLS Notification email address is managed separately.

Login and Recovery E

NMLS user benefits

- Save time by creating one username and password for all system access needs.
- Navigate NMLS more efficiently instead of having to log in and out to perform different tasks.
- Maintain one set of credentials to access NMLS instead of tracking and storing multiple usernames and passwords.
